EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE SPECIFICATION:

On page 6, in line 8 of paragraph [0017], the term "(not shown)" was deleted and replaced with --23--.

On page 6, in line 3 of paragraph [0019], the term "40" was deleted and replaced with --38--.

On page 7, in line 1, the term "41" was deleted and replaced with --39--.

On page 8, in line 6 of paragraph [0023], the term "rings" was deleted and replaced with --rollers--.

The above changes to the claims were made to incorporate the requested specification changes set forth in the amendment filed October 14, 2004 into the specification since the proposed specification changes in the amendment were not in proper compliance with 37 CFR 1.121.

IN THE ABSTRACT:

The previous text of the abstract was deleted in its entirety and replaced with the following text:

--A printing-cylinder support unit has a support frame and supporting means which are mounted on the support frame and are designed to rotatably support one of a plurality of printing cylinders in a retaining position. The supporting means have at least three support elements for each axial end of a printing cylinder, which support elements are each designed to interact with a running surface of a bearing ring which is connected to the printing cylinder. One of the support elements has a support ring and suspension means, connecting the support ring to the support frame such that it can rotate about its axis. The support ring is provided on the inner side with a support-ring running surface, and the support ring is designed so that, in the retaining position, the support-ring running surface comes into contact with the running surface of the bearing ring.--

The above change to the abstract was made to provide a clean copy of the desired abstract text as set forth by applicant in the amendment dated October 14, 2004 to insure the appropriate abstract text is entered and printed when the application issues as a patent.
